

Bernadette English and Linlee Jordan have worked together at the Harbord Homeopathic Clinic for over 20 years. The clinic, which incorporates the Children's Clinic, has a good reputation for providing effective health care solutions for children (and their families) and is recommended by local doctors, chiropractors and midwives.

Homoeoprophylaxis is a growing part of what the clinic offers and Bernadette and Linlee, along with other members of the team, make frequent updates to the HP patient handout. Their clinic handout has become a resource for students and post-graduates, so while their presentation style is informal and inclusive it includes the most recent research.

**The webinar will cover the following aspects on
'How to do an HP consultation':**

- What it involves
- When to individualise
- Importance of taking into account the parents history, ideology, anxiety and nature of the child
- Importance of parents taking responsibility
- Supplementary remedies during outbreaks (whooping cough)
- Latest research – where parents can look for info
- Issues that can arise
- Questions that parents ask
- How not to be righteous
- Consent form
- Confirmation letter
- Follow up
