

2 Day Seminar

Saturday 19 July & Sunday 20 July 2014

9.00am to 5.00pm (14 CPD Points)

Diana Plaza Hotel, 12 Annerley Road, South Brisbane

The Queensland Branch of the Australian Homoeopathic Association is proud to present

Judith Salmon

Removing obstacles to cure

The role of integrative medicine in treating complex cases in children and adults

Registrations

Please register online under Events at www.homeopathyoz.org or contact Vera Externest, AHA National Office 07 4636 5081

For further information contact Inez Hanson 0421 007 700 or info@inezhanson.com.au

Removing obstacles to cure

The role of integrative medicine in treating complex cases in children and adults

At our annual clinical skills day in February, participants were given an introduction to the work of Judith Salmon who shared her clinical insights regarding integrated approaches to the treatment of chronic disease, specifically the combining of laboratory testing and homoeopathy to address gut issues, food intolerances and the role that heavy metals play as aetiological agents. The session proved popular and left participants wanting more so we are pleased to have Judith return to Queensland for this two-day seminar on the treatment of adults and children with chronic, complex diseases such as autism, ADHD, obesity, diabetes, asthma and allergies just to name a few.

Judith brings a unique perspective to her work due to her background clinical experience. She has a science degree with majors in haematology and immunology and has worked in routine laboratories before specialising in research. In this seminar, Judith will give us an in depth perspective on how she incorporates an integrative approach to unravel and make sense of the many different symptoms and behaviours now seen in our practices. Judith will also explain which tests need to be incorporated into our practice and how the results can be a powerful guide to aid us in unlocking difficult cases, clearing the way for successful treatment.

Areas that will be covered in this seminar include:

- Overview of epigenetics, the impact of the environment on us, how these changes create new miasms and how they are inherited.
- Allergy, food intolerances and the impact of missing lactose and gluten intolerances
- The role of gut infections on the brain, immune and endocrine systems
- How to understand and clear heavy metals
- The importance of correct nutritional support
- Lifting off the damage of vaccines
- The difficulty of working with medications
- Other conditions that can have a major impact

General information:

Prior to the seminar, you will be emailed a PDF version of the slides and handouts to either print or download for use during the seminar.

Catering is provided for morning & afternoon tea; lunch is available at nearby shops and eateries or feel free to bring your own.

The Diana Plaza Hotel is located opposite the Mater Hospital, and is close to Pacific Motorway (M1) exits to/from the Gold & Sunshine Coasts

There is free onsite parking behind the hotel and also at the parking station next to the shops in the same complex.

Nearest bus station is Mater Hill (approximately 2 minute walk), the nearest train station is Southbank (approximately 5 minute walk).

Brisbane airport is an approximate 20-30 minute drive.

Accommodation is available onsite. A special seminar price is available at \$141 per night with breakfast. To book please call the hotel 07 3391 2911 OR email functions@dianaplaza.com.au. Also check online accommodation sites such as Wotif, Stayz, Lastminute for specials.

Registration closes on Tuesday 15 July 2014. Late registrations will be able to pay at the door subject to availability.

Seminar cost:

Practitioners: \$250 (AHA Professional)

\$280 (General AHA Member)

\$300 (non-AHA professional)

Students: \$180 (AHA student member)

\$200 (non-AHA student) please contact AHA National Office about FREE student membership before registering

Discounts: Early bird discount: \$30 if paid on or before 30 June 2014 OR Travel discount \$30 if travelling over 300km to the seminar

Note: only one discount can be applied to each registration

Refunds: Full amount less a \$30.00 administration fee will be refunded for cancellations made before 15 July 2014

Judith Salmon

Judith Salmon is a qualified Naturopath and Homoeopath having graduated from the Australasian College of Natural Therapies in 1998. Judith also has a Science degree with majors in Haematology and Immunology. She has worked in routine medical laboratories before specialising in research.

Her research has included work with the Red Cross in transplant medicine, cancer research (molecular genetics) specifically in melanoma research with the University of Sydney and the Melanoma Unit at the RPA. And finally, research in neurobiology on Bipolar, Schizophrenia and Alzheimer's at the Garvan Institute, Sydney.

After a year travelling overseas Judith realised it was complementary medicine that was to be her new journey. Her dream is to be a bridge between orthodox and complementary medicine where respect and understanding can flourish.
