on or before 31ST July OR
Travel discount \$15 if travelling
over 300kms

Refunds: Full amount less a \$30
administration fee before 31ST July

Session 1: Attitudes Towards and Use of HP

What do homoeopaths think about HP, and how do they use it? How do Australian homoeopaths differ from their international colleagues? This session presents findings of two international surveys of homoeopaths, conducted through Federation University Australia.

Morning tea

Session 2: Homoeopathy in Epidemics

Homoeopathy has great potential value in epidemics. As prevention, it is flexible, timely, easily administered, cost effective and safe. As treatment, it is cost effective and safe.

Lunch + AGM

Session 3: The Latest Evidence

The latest data from Cuba & India will be presented. A comparison of the evidence base of HP with orthodox evidence (in the light of the NH&MRC report)

Afternoon tea

Session 4: The Immunisation Dilemma

Can homoeopaths ethically offer immunisation options to patients? Challenges for parents and for homoeopaths who choose to use HP. Practical programs for Australian conditions.
