

Australian Homoeopathic Association: Queensland Branch presents

JON GAMBLE 3-DAY INTENSIVE

DEMYSTIFYING CHRONIC DISEASE: TOXICITY, DEFICIENCY & INFECTION

Friday to Sunday 30 August to 1 September 2013

9.00pm to 5.00pm (21 CPD Points)

Diana Plaza Hotel, 12 Annerley Road, South Brisbane

The Queensland branch of the Australian Homoeopathic Association (AHA) proudly invites you to attend this 3 day intensive seminar that will promise you results in your practice.

Modern health issues like allergy, Chronic Fatigue Syndrome, Irritable Bowel Syndrome, auto-immune and neurological diseases are becoming increasingly more common. They present challenges for any practitioner. Jon will give an overview on how chronic disease can be boiled down into these three categories: Toxicity, Deficiency, Infection. With reference to the Organon, Jon will walk you through these three major areas, the types of tests you can do to reveal them, and how to treat them by using homeopathy in an innovative way. Generous case examples are used in Jon's seminars. The focus of the seminar will then turn to Irritable Bowel Syndrome, the "bread and butter of a successful practice", as Jon describes it. Jon makes the treatment of this bewildering condition surprisingly simple.

Jon has been in practice since 1987 and is the author of the Mastering Homeopathy series:

- Accurate Daily Prescribing for a Successful Practice
- The Treatment of Irritable Bowel Syndrome
- Obstacles to Cure: Toxicity, Deficiency and Infection

Practitioners completing these three days are eligible to be listed on Jon Gamble's IBS website as accredited in his method: www.irritablebowelsyndrome.net.au For more information on Jon's work and books visit:
