## Vivienne Weinstock

Vivienne Weinstock practices as a Classical Homoeopath who uses the 'Sensations' method.

Vivienne has been treating patients in Sydney since 1994 after graduating from the

Sydney College of Homoeopathic Medicine.

Vivienne was born in South Africa, attended university in the U.K, and completed a B.A. Honours (Manchester Uni) and Postgrad Textiles (Leeds Uni).

In Sydney she helped to establish a textile mill and then became a strategy consultant with E&W and then McKinsey & Co.

In 1994 Vivienne was able to fulfill her ambition to graduate as a Homoeopath.

With 4 children of her own, the practice developed as a family practice. Vivienne has always loved working with children and has had a particular interest in immunity and autoimmune illness. Over a number of years Vivienne has developed a special focus on the treatment and management of Diabetes.

### *"Diabetes: the silent pandemic"*

By 2025 it is estimated that 1 in 8 people will have this disease and around 40% will be undiagnosed. Approximately 50% of diagnosed diabetics fail to achieve adequate blood glucose control with dire consequences including chronic infections, toe and foot amputations, blindness, erectile dysfunction, kidney failure, strokes, heart attacks and more.

According to Baker IDI Heart and Diabetes Institute, the current annual cost per patient ranges between \$3,468 with no complications to \$16,698 for patients with micro and macro vascular complication. Simply stated, the health system is failing to cope with the escalating numbers. The human tragedy is that more and more parents will outlive their children.

### *As homoeopaths how can we help?*

Statistically speaking, all practicing homoeopaths will have diabetic spectrum patients. At this seminar, Vivienne will discuss the identification of patients at risk, responsible patient management and the importance of Blood Glucose Control.

Part 1 will address Type 1 Diabetes (Insulin Dependent or Juvenile Diabetes) which affects 10-15% of diabetics.

Vivienne will discuss how, with the cooperation of endocrinologists, excellent diabetic control, together with 'quality of life' improvements, is a possibility. Vivienne's patient, Steve, who has been non-insulin requiring for over 34 months, has offered to participate at this Q&A session.

Part 2 will address Type 2 Diabetes, pre-diabetes and insulin resistance which affects 85-90% of diabetics. Again, a patient has offered to participate in the Q&A at the end of this session. The significant contribution that homoeopathy can make will become clear.

**REGISTER SOON to save \$\$ with the early bird discount!**

#### **AHA Members**

<b>Professional</b>	<b>\$55.00</b>
<b>Student</b>	<b>\$45.00</b>
<b>General</b>	<b>\$65.00</b>
